

rvm4c Remote Video Module Quick Guide

Security Systems

What is the rvm4c?

The rvm4c is the only plug and play, remote video transmission system that delivers compressed, high-quality color video images over standard telephone lines and includes the Bosch exclusive Verification Input. Combine the rvm4c with a Bosch 6000 Series control panel for a cost effective, high quality video alarm verification solution. It's easy to use and simple to install!

Why should you use the rvm4c?

- **Alarm verification** is quickly becoming a requirement in many cities. The rvm4c delivers high quality video verification over standard phone lines. When used with a D4412 or D6412 control panel the rvm4c shares the phone line seamlessly.
- **Recurring Monthly Revenue (RMR) Opportunity**
Many central station automation software providers and many major monitoring companies support the rvm4c and are ready to receive high quality video today! A variety of RMR opportunities, including alarm verification, video guard tours, and video openings and closings are available right now.
- **End user look in** — with the Windows software included with every rvm4c you can offer your customers cost effective, secure, efficient 'look-in' functionality from any PC.

Typical alarm verification configuration:

What makes the rvm4c different?

A custom hybrid jpeg algorithm ensures high quality video transmission no matter what the bandwidth is or how much motion is in the video.

The rvm4c works with most existing CCTV equipment so there is no need to reconfigure the entire location with special cameras or wiring

The rvm4c unit can be installed with most control panels but its unique 'verification input' takes full advantage of the Bosch 6000 Series control panels' alarm verification features. This allows the control and rvm4c to seamlessly share the same phone line.

The rvm4c records and transmits pre and post-alarm activity. Most central station automation software and many major monitoring stations are ready to receive verification video events today!

The rvm4c is easy to use and simple to install.

rvm4c Remote Video Module Quick Guide

Security Systems

rvm4c and Accessories	Model Number	Description
	rvm4c	Remote video module: four video inputs, verification input for integrated alarm verification, RS232 port for control of pan/tilt/zoom dome cameras, built-in video switcher and video output. Patented video compression technology and a RISC communication processor combine to provide maximum frame rate, high quality video transmissions. Pre and post alarm video for all cameras.
	ccs	Control Center Software: windows application for end users. Allows "look-in" from any remote (via PSTN) or local (direct connect) computer. Users can look in, control relays or control pan/tilt/zoom cameras. Windows CE version available for pocket PCs and other CE compatible devices is included with the rvm4c.
Cameras	Model Number	Description
	CAM940 CAM940C	The CAM940 (monochrome) and CAM940C (color) offer selectable sensitivity for installation versatility. The integrated camera is complete with timer and relay outputs for alarm and activation of the rvm4c.
	LTC 0435-28W	Dinion color camera featuring 1/3 inch with 2.8 mm varifocal lens and wall/ceiling mount. Visit www.boschsecurity.us for a complete listing of our CCTV products.
	LTC 1412/20	FlexiDome Color Camera featuring 1/4 inch with 3 mm lens. Visit www.boschsecurity.us for a complete listing of our CCTV products.
	LTC 2810/90	Color Video Monitor - 9 inch.

rvm4c Kits	Model Number	Description
	IUI-rvm4c-940C	This kit includes the rvm4c Remote Video Module, one CAM940C motion detector with integrated CCD Color Camera and a D8132 Charger/Power Supply Module
	IUI-rvm4c-FLEXI	This kit includes the rvm4c Remote Video Module, one LTC 1412/20 FlexiDome Camera and a D8132 Charger/Power Supply Module.
	IUI-rvm4c-DIN	This kit includes the rvm4c Remote Video Module, one LTC 0435-28W Dinion Camera and a D8132 Charger/Power Supply Module.
	IUI-rvm4c-IOS	This kit includes the rvm4c Remote Video Module, four LTC 1412/20 FlexiDome Cameras, four TC1323 Power Supplies, one LTC 2813/90 9" Monitor, two DS835i TriTech Motion Detectors, a D8132LT Power Supply, a D623 LCD Keypad, a D4412 Control/Communicator and a D1640 Transformer.
